Duane Graveline MD MPH, United States, 2008. Paperback. Book Condition: New. 213 x 137 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.If you are on a statin drug or are thinking of going on a statin, this fully referenced book, Statin Drug Side Effects, is a must read for you. The unacceptable legacy of statin drug use at today s high doses is a trail of chronic aches and pains, numbness, weakness, confusion, fatigue, shortness of breath and even heart failure in hordes of unsuspecting victims. Only by knowing this information, and in consultation with your healthcare professional, can you make an informed decision about your health care. If you are a user of Vytorin, Lipitor, Zocor, Crestor, Mevacor, Pravachol or Lescol you must read this book. Most of the statin side effects I discuss are unknown to your busy doctor. Although knowledgeable about muscle and liver problems, few have heard of statin amnesia and other forms of memory dysfunction and fewer still associate hostility, aggression and profound depression as statin related. As a former astronaut, aerospace medical research scientist, flight surgeon and family doctor, I was appalled by the lack of information in the medical community on the full range of side effects of the statin drugs. This book is a comprehensive reference source and summary of side effects of statin drugs.
