Not illustrated. 1907 Excerpt: .leaders an inch or so in thickness, many of which carry good gold values, and from the breaking down of these most of the alluvial gold has evidently been derived. Some of these leaders are fairly persistent and run for considerable distances, whilst others are of very short length. All the main lines of reef exhibit a marked parallelism, striking as a rule five to ten degrees west of north and dipping to the west at an angle of about fifty degrees. Both the larger reefs and the leaders exhibit at times a marked lenticular habit, but this can hardly be said to be the general characteristic. The quartz in the larger reefs is usually white and glassy, being very hard and solid, and as a rule of low grade, though some fairly good crushings have been taken out of one or two of them. A...
