## THE ALBEBRA OF INVARIANTS (PAPERBACK)

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1903 Excerpt: .transformation is equivalent to an inversion with respect to A, and a reflexion with respect to the real axis through A; but the properties of the derived figure are evidently unaltered by a reflexion alone, and hence they are unaltered by an inversion alone. 174 A. Some of the simpler invariants and covariants can now be interpreted. If  $az + 2bz + c = 0$ ;  $a z + 2b z + c = 0$  represent the points A, B and G, D respectively, then when  $ad + a c - 266 = 0$  A, B, C, D are four harmonic points on a circle. In fact on changing the origin to 0, the middle point of AB, the first quadratic becomes  $z - k_0$ , and if the second be  $(z - z_j)(z - z) = 0$ , then since the relation is invarientive we have therefore  $OC \cdot OD = OA \cdot OB$  and OG, OD are equally inclined to OA. If we produce GO to D making  $OD = OD$ , we have  $OG \cdot OD = OA \cdot OB$ ; therefore CAD B are concyclic, and by symmetry D is on the circle. Further as the pencil D ACBD) is harmonic the four points AB and CD form two harmonic pairs on the circle. We shall call them harmonically concyclic. Ex. Shew that there is one pair of points (P, P1) harmonically conocyclic to each of two given pairs (A, B) and (C, D). Further if (, 0 be harmonically concyclic to A, C), (B, D) and (R, R) to (A, D), (B, (7),...
