Atlantic Publishing Group (FL). Paperback. Book Condition: New. Paperback. 288 pages. Dimensions: 8.9in. x 5.9in. x 1.0in. In the United States alone, the annual construction of over one million new homes causes a very substantial drain on natural resources. Today, approximately 60 percent of the timber cut down in our country is used for building homes. Using alternative home building materials and creating a greener home are about creating better homes that are environmentally friendly, are less expensive in the long run, and create healthier occupants. Unfortunately, many people are unfamiliar with alternative building materials and do not know the first thing about going green. However, **The Complete Guide to Alternative Home Building Materials and Methods** will teach you everything you need to know about this movement toward natural construction methods. This book will show you how to identify, locate, and effectively use alternative building materials. You will learn about straw bale, cordwood, cob, adobe, rammed earth, light clay, pis, earthbag, bamboo, earth-rammed tires, cork, wool carpeting, sod, compressed earth, earth plaster, beer cans, bottles, as well as living roofs and more. In addition, you will learn the costs and performance characteristics of these materials and construction techniques for each, as well as how to integrate plumbing and electricity into these unfamiliar materials and substitutes for conventional approaches. You will also learn about the structure, climate control, siting, foundations, and flooring options you gain when using these materials. Also included are the advantages and benefits of alternative building materials for both consumers and builders and the key ecological design principles. Ultimately, you will come to understand that these materials are cheaper, easier to build with, stronger, more durable, and more fire resistant. Architects, designers, students, homeowners, home buyers, owner builders, and those who want to build for a sustainable future will...
