

Mortality from Respiratory Diseases in Dusty Trades (Inorganic Dusts) (Paperback)

By Frederick Ludwig Hoffman

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1918 Excerpt: .of the cement upon the skin. According to a brief discussion in the Medical Times (October, 1909)--Some physicians have attributed the corrosive action to calcium carbonate and to sulphuric acid. Fresh cement, however, does not contain calcium carbonate; and it is questioned whether slacked lime or even partly slacked lime will produce this effect, for masons working with lime mortar are seldom if ever attacked with cement makers itch. The quantity of sulphuric acid in cement is very small. Possibly the effect may be explained by mechanical friction between the skin and very fine but hard particles of cement. Briquette makers, observes Scientific American, are subject to a similar but less serious annoyance. Cement makers itch and ordinary itch have one symptom in common--intense itching, especially at night. The itching appears to be increased by the heat of the bed, and is also more annoying in...
