

Engineering Mechanics (problem set in the 21st century with vocational and technical education planning materials)

Filesize: 8.03 MB

Reviews

Very helpful for all class of people. Sure, it is actually play, nonetheless an amazing and interesting literature. It is extremely difficult to leave it before concluding, once you begin to read the book.
(Carole McClure)

ENGINEERING MECHANICS (PROBLEM SET IN THE 21ST CENTURY WITH VOCATIONAL AND TECHNICAL EDUCATION PLANNING MATERIALS)

paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 259 Publisher: Southwest Jiaotong University Press. Pub. Date :2008-02. This book is divided into two. first as a static. the main research object of the law of force and balance; second for the mechanics of materials. mainly planted in the Dutch study of the various components of the deformation and failure under the law. According to the characteristics of the current vocational education reform. integration in content. linking. and organically fused. Each chapter has a summary and reflection questions are. and exercises with separate volume. in order to cultivate students thinking and innovation. Contents: Introduction Chapter first statics statics statics section of basic knowledge of the basic concepts of the basic axioms of Section III static stress analysis of an object to think with the problem by trying Summary Chapter statics section calculated on the basis of the axis force projection force projection theorem II co-forces on the point of the moment and the moment theorem of the fundamental nature of couple III Summary Chapter III of thinking questions the basic system of forces plane section plane force system Section III a simplified system of forces generally flat surface generally balanced system of forces thinking questions Chapter Summary section of space force system in space Cartesian coordinate axis force projection - the moment of force on the axis II space force equilibrium balance equation of the center of gravity and centroid III Summary thinking questions second chapter the basic concepts of mechanical deformation of solids and their underlying assumptions Section II external forces. internal forces and stress the basic concept of the third quarter bar deformation in the form of Chapter VI Summary thinking questions section axial...
