GUIDE TO FLUORESCENCE LITERATURE

Book Condition: New. Publisher/Verlag: Springer, Berlin | Volume 3 | The Guide to Fluorescence Literature is designed to free investigators and analysts of the tedious task of literature searching. It is disturbing to learn that duplication of research is still quite common. Martyn has reported that 31 percent of all researchers would have acted differently had they known all that was known about the subject matter of their projects when they started them [New Scientist 21(377):338(1964)]. There are also reports indicating that the...
