It must be observed that in those spaces in which we supposed the fluid to be moveable, as in the space ABba for example, though the fluid is able to move freely from the plane Ah to ab, that is, though it moves freely in the direction Aa or aA, or in a direction perpendicular to the plane of the plate, yet it must not be able to move lengthways, or from A to B, for if it could, and one end of the plate AE was electrified, some fluid would instantly flow from AE to BD, and make that end overcharged, which is well known not to be the case. The same thing must be observed also with regard to the two former ways of explaining this phenomenon. 353 The chief reason which induces me to prefer the latter way of accounting for it is...
