Brand New Book ***** Print on Demand *****.Excerpt from Janus in Modern Life These papers essay an understanding of some of the various principles which underlie the course of political movements in the present age. There is no attempt at introducing any considerations which are not familiar to every intelligent person, nor any comparisons with other instances which are not already well known in history. Why considerations which seem so obvious when stated, should yet not be familiar, may perhaps be due to the estrangement between science and corporate life, which is an unhappy feature of a time of transition both in education and in motives. The point of view here is that of public and general conditions and not of private variations of beliefs. Such moral factors, though all important to the individual, are not so much the subject of the direct physical causes and effects which are here considered. Similarly the beneficial result of private benevolence is not added to these considerations, because it is largely outside of the effects of conduct, and finds its good in amending or neutralising the evil consequences of various actions.
